elegance limestone

Limestone is a carbonate sedimentary rock consisting of more than 50% of calcium and sometimes composed of the skeletal fragments of marine organisms which are revealed as fossils in the paving surface.

Our Elegance Limestone is available in a range of colours from deep black to the yellow shades of rustic.

The black and grey colours are subject to weathering over time which will result in a subtle change in colour to a lighter shade.

Available in patio paving, setts and walling.

elegance limestone walling

The soft tones of limestone walling is ideal for blending with traditional buildings and the natural landscape, whilst being perfect for constructing a distinctive and natural feature.

coastal granite

With a subtle textured anti-slip surface and consistency in colour, granite paving slabs are a superb and economical option for creating a modern or minimalistic outdoor space, adding an amount of sophistication to any patio.

Famous for its use in Cornwall and the South-West, granite gives a traditional feel to any walling project. Robust and light in colour, our walling stone will create a great first impression on any property. A choice of buff or grey in colour, which can also be mixed.

Granite Setts are suitable for any areas that see high amounts of footfall, due to their high durability, anti-slip and scratch-resistance properties.

coastal granite walling & hedging

Available in silver grey or buff

Walling cropped to a straight edge. Hedging in random size, natural face.

ocean slate

For hundreds of years slate has been the material of choice for longevity and weather resistance, and is one of our most popular products. The sawn edge finish gives a very smart look to go with any contemporary property. Our weathered finish range will complement and enhance any restoration project, giving the look of reclaimed without the installation cost or expense.

A photograph of a traditional stone building with a steeply pitched slate roof. The building features several windows with light-colored frames and a small dormer window. The walls are constructed from rough-hewn stone. The building is surrounded by lush greenery, including trees and shrubs, under a clear blue sky.

Available in a range of colours, slate walling offers a waterproof stone with easy working characteristics.

Our Celtic range is a very hard slate from reclaimed roofing grade stone, and offers impressive environmental credentials as a recycled product.

Cropped slate corners are available to enhance window returns. We also offer lintels and cills in bespoke sizes if required.

ocean slate crazy paving

20mm thick, random shaped slate

Available in rustic or blue-grey

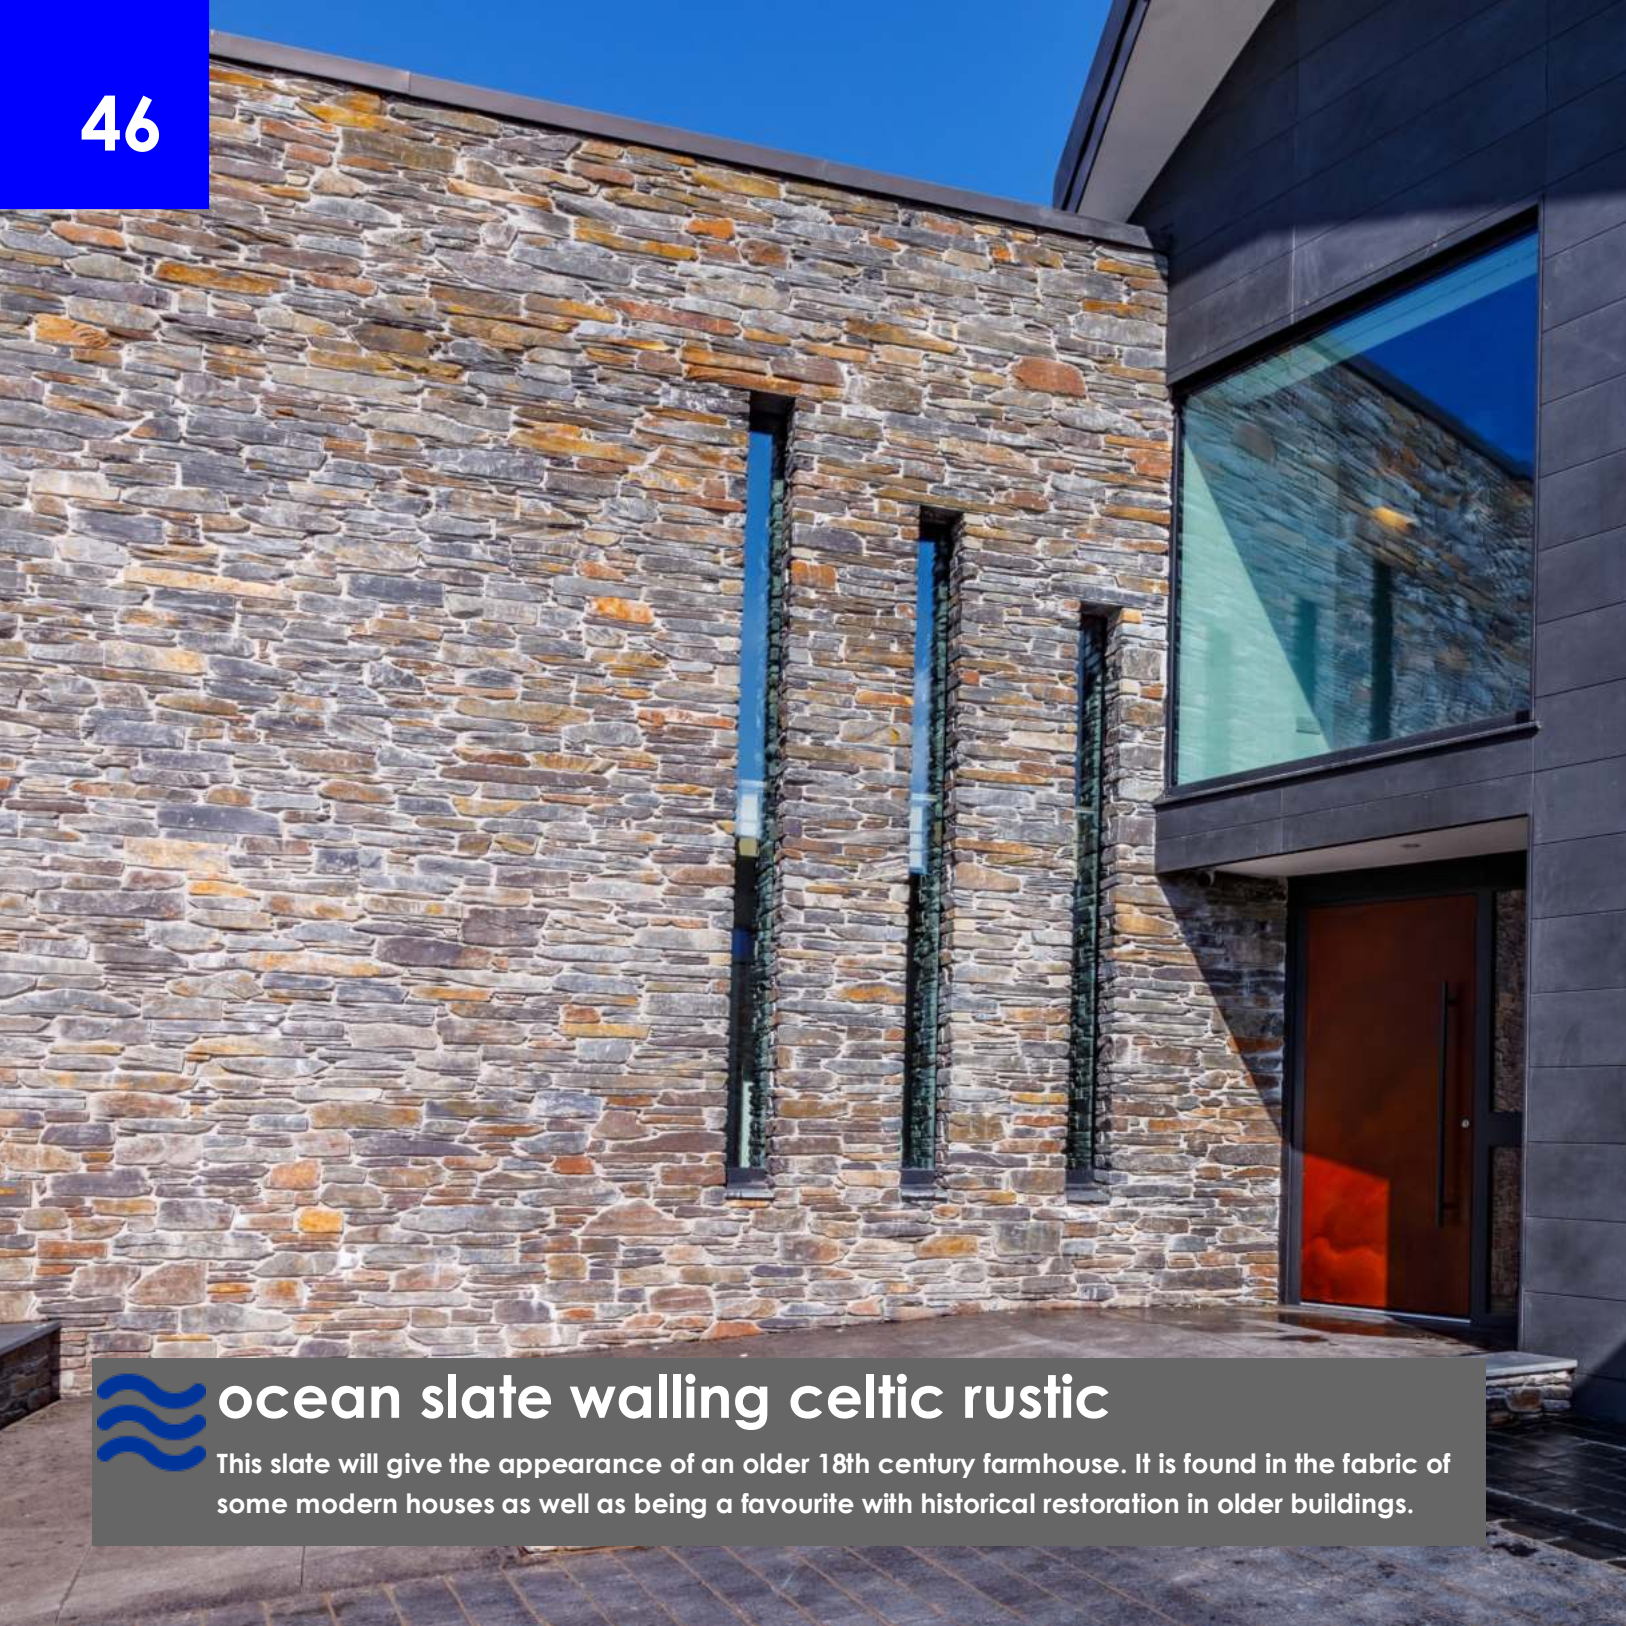

ocean slate walling celtic tumbled

Produced entirely from reject stone of the roof slate industry, giving it excellent green credentials. The hardest, most dense slate quarried in the British Isles and dark blue/grey in colour.

ocean slate walling celtic cropped

A very popular product with both clients and stone masons, because of its clean edge. Unlike all other stone, it is capable of being split longitudinally into flat blocks.

ocean slate walling celtic rustic

This slate will give the appearance of an older 18th century farmhouse. It is found in the fabric of some modern houses as well as being a favourite with historical restoration in older buildings.

ocean slate walling cornish blue sawn

A blue slate quarried in Cornwall sawn both sides with natural ends.

100mm deep and a coverage of 4m² per ton.

ocean slate walling trethowel grey

Available in 100mm and 150mm widths. A relatively soft slate that weathers in colour over time, going from light grey to soft tan and yellow.

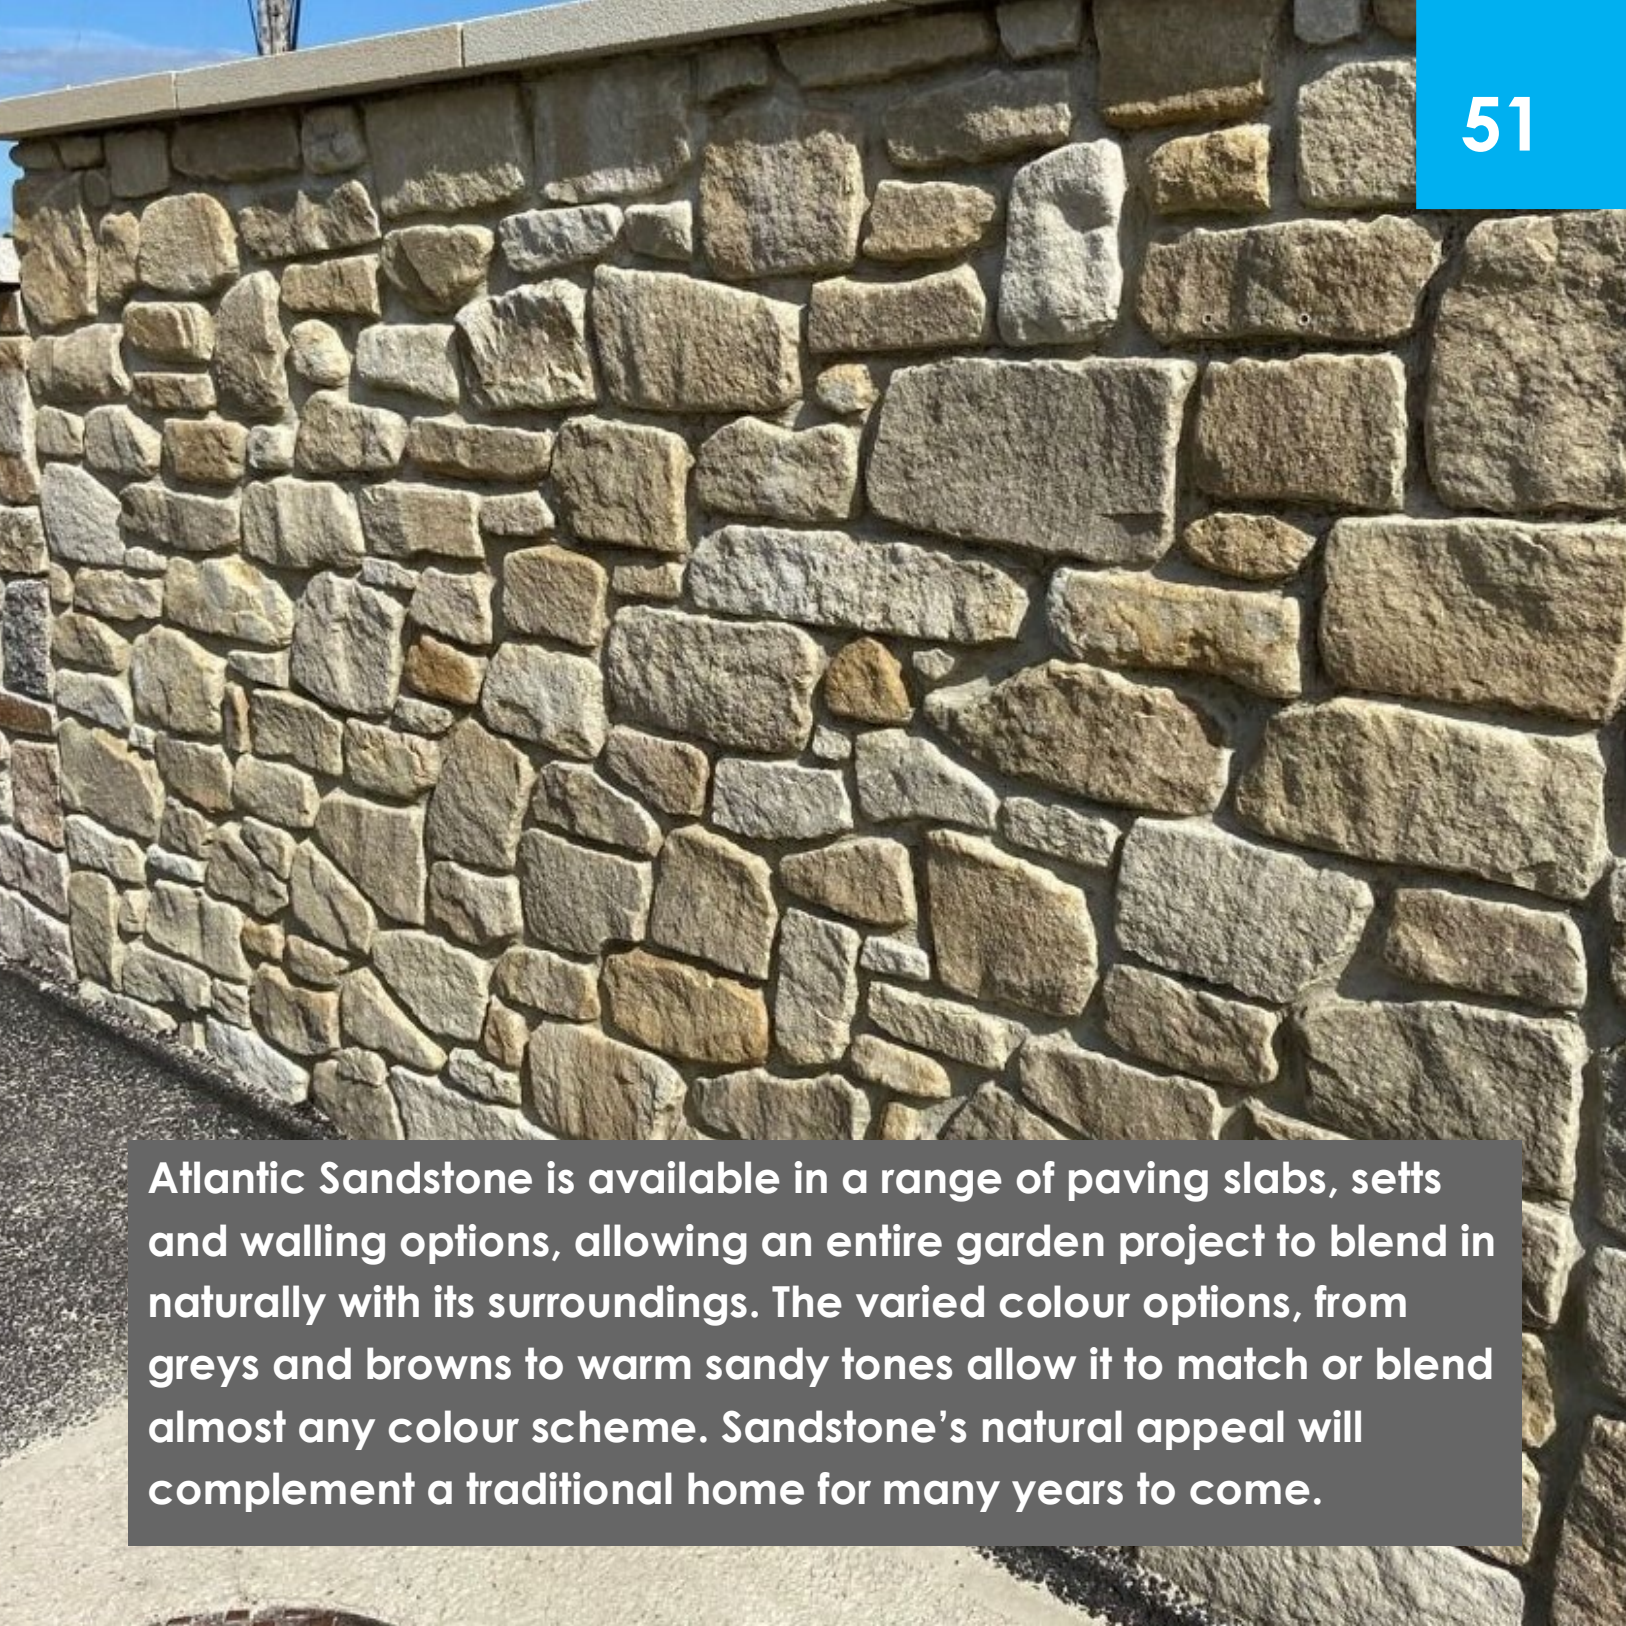

ocean slate walling trethowel rustic

A soft slate with rustic brown natural face coupled with undertones of light grey and soft yellow. It is metamorphic, around 400 million years old and splits very easily making it easy to work with.

atlantic sandstone

Sandstone is a type of sedimentary stone, formed over millions of years through the natural compression of sand and aggregate. Due to the layered nature of its formation, sandstone occurs in a wide range of colours and tones, giving a wide choice of paving options. The naturally riven surface and earthy tones blend in well with traditional homes.

Atlantic Sandstone is available in a range of paving slabs, setts and walling options, allowing an entire garden project to blend in naturally with its surroundings. The varied colour options, from greys and browns to warm sandy tones allow it to match or blend almost any colour scheme. Sandstone's natural appeal will complement a traditional home for many years to come.

With subtle colour variations and random sizes, sandstone walling offers the perfect solution for traditional projects.

crystal porcelain

The crystal collection of 20mm porcelain is inspired by natural stones. All tiles achieve a minimum anti-slip value of R10/R11, and will retain their deep colour year after year.

Above: Sydney Grey

Porcelain is highly resistant to scratches, staining, heavy loads and temperature changes, making it the perfect choice for an “all-round” durable surface. Once installed, the tiles require no extra maintenance.

forest

Our Forest collection offers a choice of low maintenance, high quality composite decking, including: Platinum, Oxford and Millboard which offer a long-life alternative to timber decking.

A photograph of a Japanese-style garden. In the foreground, a gravel path leads towards a stone lantern. The path is bordered by a wooden deck on the left and a gravel bed on the right. Various shrubs, including a large green one on the left and several red-leafed ones on the right, are planted along the path. In the background, a wooden fence with a circular window is visible, surrounded by trees and more foliage.

For that finishing touch, Contec offer a range of high quality natural and artificial turf.

Our selection of decorative aggregates, sleepers, topsoil and bark products complete the look.

forest natural stone wall cladding

A truly modern and innovative way to bring a natural stone feature wall to your home or business.

forest TIER wall cladding contemporary

TIER® Contemporary Flat Panels and Corners are all made from natural stone and are suitable for interior or exterior applications. The Finger Corners are designed and manufactured in a way to achieve the most authentic-looking corner possible.

forest TIER wall cladding standard

These modular shapes fit seamlessly together, eliminating the need for specialized labour. The unique panel shape and design found in our Standard Range, with the “L” shape corners create that seamless professional final look for your project.

A close-up photograph of a house's exterior featuring a gable roof. The roof is covered with dark grey asphalt shingles. The gable end and the area around a window are clad in light grey or off-white cement fibre siding. The siding has a horizontal, wood-grain-like texture. A dark-framed window is visible, showing a blurred green landscape outside. The lighting suggests a bright, sunny day, casting soft shadows.

forest cement fibre siding board

3000x200x10mm

One of the main reasons that architects opt for fibre cement over other low-cost alternatives is that, when detailed properly, it looks like a much more expensive product.

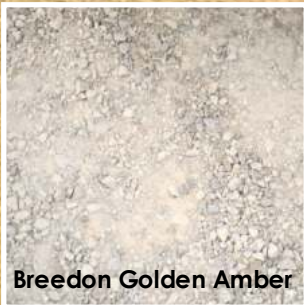

Dense, high-quality fibre cement panels can mimic the appearance of stone or concrete at a much lower cost.

Provides a surface which knits together to form a solid bonded, durable base. The nature of the product is that it scarifies with use for a beautiful, natural soft appearance. A popular choice for hospitals and sensory gardens being a 100% natural material,.

forest gas fire pits

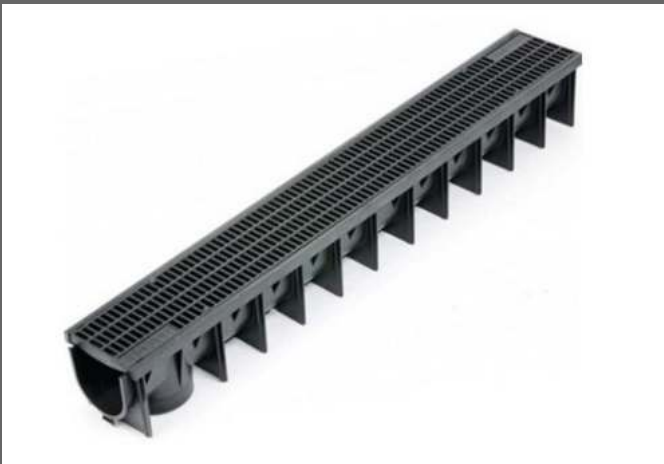

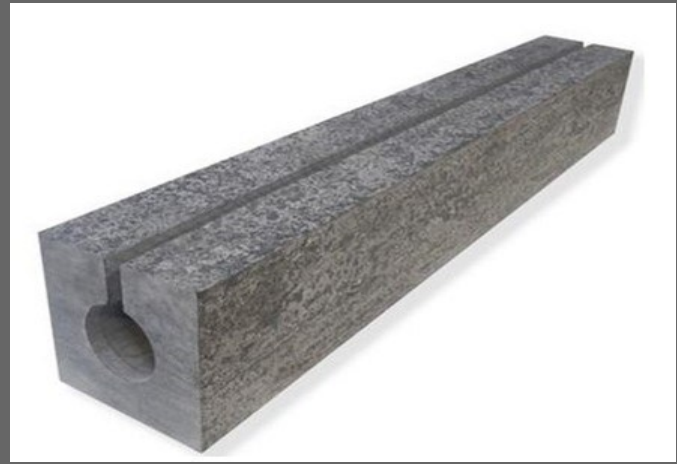

Decorative gas fireplace made of high-quality fibre material in a premium look. These fireplaces become the highlight in any garden and on any terrace. The accessories include reddish lava stones, a stainless steel burner bowl and the protection of the glass windshield.

forest outdoor modular kitchen units

Design and create outdoor living spaces faster and easier with our modular system, without the hassle of traditional joining building methods. Our range of Modules allow you to design and build an outdoor kitchen or bar to any size and configuration in a matter of hours!

forest drainage

From lengths of bespoke cut granite, to standard black polypropylene mesh channel and grating, we can offer a range of drainage options to suit your design and budget. We also offer an inset manhole cover for a paved option to the standard metal or plastic topped manhole cover.

ProJoint Fusion

The all weather paving joint compound.

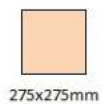

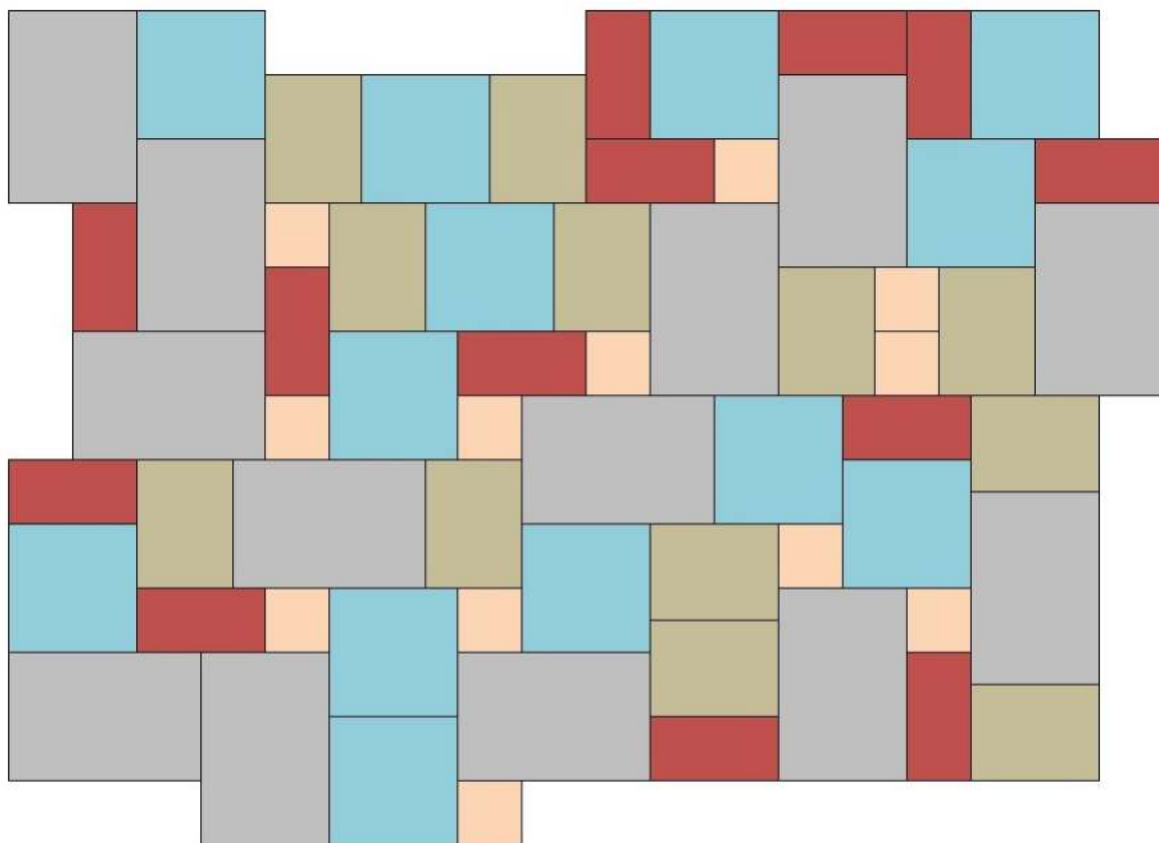

The quick and easy solution to filling joints between paving slabs and setts, suitable for natural stone and concrete paving. Simple to use, ProJoint Fusion allows an untrained hand to consistently deliver perfect joints every time - whatever the weather!

It delivers a weed free, frost resistant joint, without staining the paving - saving you time and money. ProJoint Fusion is supplied in two vacuum-packed pouches within the tub.

ProJoint Fusion is available in 4 colours: neutral (buff), mid grey, basalt and black.

The ProJoint Porcelain Primer is an ultra-high polymer and fibre modified flexible primer with excellent workability and adhesion properties. As a single coat fast application, ProJoint Porcelain Primer promotes adhesion and control suction on difficult substrates such as porcelain, concrete, ceramic tiles, paving slabs or setts. Using the ProJoint Porcelain Primer enables the porcelain slabs or setts to be laid on a sand and cement bedding. The powdered primer is supplied in two 10kg bags to allow the bucket to act as the ideal mixing vessel with the simple addition of water.

Mattstone

A natural, matt finish impregnating sealer that will delicately enhance colour and texture.

Intensifier & Stain Block

Provides enhanced matt finish. Strongly protects against water, oil, grease and dirt.

External Stone Sealer

Delicately enhances appearance. Protects against weathering & efflorescence. Moisture-repellent and stain resistant.

Mattstone H2O

Water based impregnating sealer. Environmentally safer & low odour.

Grimex

Intensive cleaner, effective for removing stains such as oil, grease, ingrained dirt, and grime.

Cement, Grout & Salt Remover

A rapid action cleaning agent for removing cement residues, grout stain, salts, efflorescence and other similar deposits.

Contec South West Limited have built a robust supply network, sourcing from the same quarries and suppliers that have provided predictable and consistent supply to our customers for many years.

We are committed to ensuring that all of our products are quarried and sourced to the highest ethical standards. This ownership and stability allow us to provide customers with the continuity, consistency and quality of supply expected from us.

All natural stone from Contec is quarried and dressed by skilled craftsmen, using time honoured techniques designed to retain all the beauty and inherent strength of the stone. When ordering, customers should be aware that there will be a variation in colour and texture of all of our natural stone products.

Excellence in customer service is a prime focus for all at Contec. We are as passionate about the service we provide as the products we supply. We have a dedicated customer support team, combining in-depth market knowledge with a firm commitment to sustained customer care.

We also offer a bespoke cutting and finishing service to cater for the specific requirements of your project.

If you're looking for an installer, please contact us here at Contec. Our trade customers include award winning landscape designers & installers. We'd be happy to recommend one of them to you.
